*In the past 30 years there has been an increasing and sometime bewildering choice of teaching methods and means available to TESOL including teachers of English for Specific Purposes (ESP) globally and locally. In this interactive plenary I outline how language teachers can reflect on their use of methods while teaching. Reflecting on our practice suggests that our teaching experience is not enough, for we do not learn much from experience as much as we learn from reflecting on that experience; thus experience combined with reflections can lead to growth and this is how we become more effective language teachers.*
